

Le Minh Quang

- FullStack Engineer -

 Portfolio  lmquihdev@gmail.com  036 483 5692  [Le Minh Quang](#)  Quindart

Summary

Junior Software Engineer with 1.5+ years of experience specializing in the React/React Native and Golang, NodeJS. Proven track record of delivering high-performance, scalable web and mobile solutions across diverse sectors, including AgriTech, EdTech, Retail POS, and E-commerce. Expert in architecting real-time systems, GPS data tracking, and BLE IoT integrations.

Skills

- **English:** TOEIC 605
- **Programming Languages:** JavaScript (ES6+), TypeScript, Golang.
- **Frontend:** ReactJS/ React Native, Next.js, Redux Toolkit, TanStack, TailwindCSS, ShadcnUI, Zustand, Expo.
- **Backend & Database:** Echo/Golang, Node.js/ExpressJS, MongoDB, MySQL, Redis, PostgreSQL, Rest API
- **DevOps & Systems:** Docker, Jenkins, NGINX.
- **Others:** Jira (Agile/Scrum), Claude Code - Superpower.

Education & Achievement

Industrial University Of Ho Chi Minh, Software Engineer

- GPA: 3.4/4.0 (8.2/10), Scholarship in the Software Engineering major [certificate](#)
- 1st Rank, Webdev Adventure Hackathon 2023 (VNUHCM - UIT). [certificate](#)
- Publication: Scientific Report (2024) – "Graduation Thesis Management System at IUH". [link](#)

Experience

TechCoop — Software Engineer

March 2026 – Aug 2026

Links Demo: [TechCoopvn](#), [Techcoop connect app](#)

Software Engineer ownership of **AnchorApp** — a B2B2C agri-finance platform connecting farmers and agribusinesses for supply-chain financing. Managed sprint planning, backlog grooming, and cross-team task tracking using **Jira**, coordinating deliverables across backend, mobile, and QA tracks in an Agile workflow.

AnchorApp — Core Backend Service | Go, PostgreSQL, Redis, Azure Service Bus, OpenAPI 3.0, Docker, Zalo OA service

- Designed a contract-first REST API with JWT + OTP authentication (Zalo & SMS), eliminating client/server schema drift and enabling parallel frontend development.
- Implemented an event-driven async pipeline via Azure Service Bus, decoupling disbursement and notification flows from the synchronous request path and improving system resilience.
- Established full observability — OpenTelemetry → SigNoz for tracing and Sentry for error tracking — enabling sub-minute incident detection in production.

TechCoopConnect — Customer Mobile App | React Native, Xcode, TypeScript, TanStack Query, Zustand

- Built the customer-facing mobile app for the agri-finance platform on iOS and Android from a single React Native + Expo codebase.
- Implemented state management with Zustand and server-state synchronisation with TanStack Query, ensuring consistent UI responsiveness and offline-resilient data flows.
- Configured EAS build and OTA update pipeline, reducing release cycle time and enabling hotfixes without App Store re-submission.

AIIVN - Software Engineer

Jun 2025 – March 2026

Links Demo: [Landing-page](#), [Techcombank-marathon](#), [Appstore-smart-home](#)

GPS Techcombank International Marathon 2025 | ReactJS, Mapbox, NodeJS, GPS Tracking

- Led the development of a real-time athlete tracking web application serving over 10,000+ runners and spectators.
- Integrated Mapbox for high-precision landmark visualization, ensuring 100 percent route accuracy.
- Optimized GPS signal to reduce noise, improve location accuracy on browsers.

Smart home Bao Tang Chung Tich Chien Tranh | ReactNative, Mapbox, Swift

- Developed a comprehensive IoT-integrated mobile application (Smart Museum) for device management and status monitoring.
- Engineered real-time Bluetooth signal processing across various Android/iOS core versions.

GPS Tokyo Taxi Navigation Platform | Node.js, Geofencing, Audio Processing

- Developed a GPS-driven platform automating location-based audio playback for tourist attractions using geofencing.

- Researched and resolved auto-play audio restrictions on modern browsers (Chrome, Safari) for seamless user experience.

Freelancer - Frontend Engineer & Devops

Jun 2025 - Oct 2025

Links Demo: trustcoupon.com

Trust-coupon.com | *Next.js, MongoDB, Docker, Jenkins*

- Developed an E-Commerce Coupon Platform featuring a modern UI for coupon distribution and a financial blog.
- Aggregated and displayed active coupons from major global retailers, including Amazon, eBay, and Walmart.
- Optimized Core Web Vitals to achieve 90+ scores on Google Lighthouse, significantly improving SEO and page load speed.
- Implemented a full CI/CD pipeline using Jenkins, Docker, NGINX, and Dozzle for automated deployment.

IUH Education - Admin & Fullstack Engineer

Jan 2024 - Dec 2024

Source Code: [Web](#), [Mobile](#), [Backend](#)

IUH Thesis Management Platform | *React/React Native, Node.js, MySQL, Redux*

- Developed a comprehensive cross-platform system (Web & Mobile) for thesis management using TanStack Query and Material-UI.
- Managed academic workflows for **1,200+ students** over 4 semesters, handling grade processing, multi-format reporting (PDF, Excel), and Role-Based Access Control (RBAC).
- Integrated an intelligent chatbot using Cosine Similarity algorithms to assist students in selecting from 200+ thesis topics.
- Implemented a drag-and-drop interface to optimize assignment scheduling and submission processes.

Aegona - Fullstack Internship

Jan 2024 - May 2024

Links Demo: Gamora.com, NEOM.com

Gamora & Neom POS Systems | *React.js, Node.js*

- Developed GAMORA POS, a comprehensive solution for Sports & F&B sectors, integrating field booking management.
- Designed a custom virtual POS interface allowing complex workflows like coupon application and draft order management to optimize checkout speed.
- Built NEOM POS for the beauty retail industry.

CodeMely - Technical Collaborator GEN 0.5

Oct 2023 - Dec 2023

E-Commerce Platform | *React.js, MUI, TypeScript*

- Developed and implemented a product management page for a clothing e-Commerce platform.
